

FOR IMMEDIATE RELEASE

Array Networks Included in the Gartner Application Delivery Controller Magic Quadrant

Evaluation Based on Completeness of Vision and Ability to Execute

MILPITAS, CA – September XX, 2009 – [Array Networks Inc.](#), a leading provider of secure application delivery and universal access solutions, today announced it has been positioned by Gartner, Inc. in the “Niche” quadrant of the 2009 Magic Quadrant¹ for Application Delivery Controllers (ADCs) from Gartner, Inc.

Array was included in the Magic Quadrant based on Completeness of Vision and Ability to Execute. Criteria for inclusion in the Magic Quadrant for ADCs include:

- The vendor has released products for general availability, and has demonstrated its commitment to this market.
- The vendor is focused on delivering solutions to the enterprise market, and demonstrates relevance to Gartner clients.
- The vendor must have achieved at least 1% market revenue share in the overall ADC market in 2008.

“We are happy that Gartner recognizes Array’s vision and execution by including us in the ADC Magic Quadrant,” said [Michael Zhao](#), president and CEO of Array Networks. “Our new APV series of application delivery controllers, which deliver high-performance and security using green platforms, have received a strong reception in the market. Our innovations in SpeedCore architecture that power the latest generation of application delivery and traffic management devices represent our commitment to provide customers with solutions that make applications fast and secure, while driving down overall data center and application networking costs.”

About the Magic Quadrant

The Magic Quadrant is copyrighted September 2009 by Gartner, Inc. and is reused with permission. The Magic Quadrant is a graphical representation of a marketplace at and for a specific time period. It depicts Gartner's analysis of how certain vendors measure against criteria for that marketplace, as defined by Gartner. Gartner does not endorse any vendor, product or service depicted in the Magic Quadrant, and does not advise technology users to select only those vendors placed in the "Leaders" quadrant. The Magic Quadrant is intended solely as a research tool, and is not meant to be a specific guide to action. Gartner disclaims all warranties, express or implied, with respect to this research, including any warranties of merchantability or fitness for a particular purpose.

About Array Networks
