

FOR IMMEDIATE RELEASE

Array Networks' Awarded ISO 9001 Quality Certification

High quality management practices ensure product reliability for networking and secure remote access industries

MILPITAS, CA -- December 22, 2009 -- [Array Networks Inc.](#), a leading provider of optimized and secure universal access solutions, today announced it has obtained ISO 9001:2008 quality certification from the Standards American Registration Authority (SARA) for its manufacturing of [SSL VPN](#) and traffic manager systems.

As a U.S. based registrar, SARA visited Array Networks on-site to thoroughly assess its management systems based on four key processes: environment, occupational health and safety, business risk and social responsibility. Based on these results, Array met all requirements of the ISO 9001:2008 and was subsequently awarded certification.

“At Array, we’re proud of our commitment to quality work and processes,” said Fara Zarrabi, vice president of operations for Array Networks. “Today’s news of the ISO certification is recognition of the efforts of the entire Array team. ISO certification assures our customers that Array is delivering the highest quality and reliability in our product line.”

The registration period for the ISO certification is December 1, 2009 – November 30, 2012. As a specialist in management registration and assessment services, SARA will make regular on-site visits to confirm that Array continues to meet all standard requirements.

About Array Networks

Founded in 2000, Array Networks is a global leader in enterprise secure application delivery and universal access solutions for rapidly growing SSL VPN and application acceleration markets. More than 3,500 customers worldwide – including enterprises, service providers, government and vertical organizations in healthcare, finance, insurance and education – rely on Array to provide anytime, anywhere secure and optimized access. Industry leaders including Deloitte, Red Herring, and Frost and Sullivan have recognized Array as a market and technology leader.
