

**FOR IMMEDIATE RELEASE**

## **Array Networks Surpasses 5,000 Enterprise Customers**

*Celebrating ten years in business, Array's secure application delivery and universal access solutions attract customers worldwide, across multiple industries*

**MILPITAS, CA – August 12, 2010 – [Array Networks Inc.](#)**, (TWO: 3664) a global leader in secure [application delivery](#), today announced that it now serves over 5,000 enterprise customers worldwide including many of the largest enterprises and service providers. Celebrating ten years in business, Array's secure application delivery and universal access solutions deliver hundreds of terabytes of secure data traffic daily to customers worldwide, across multiple industries.

Some of the world's largest companies rely on Array, including:

- Over 20% of the [Forbes Global 2000](#)
- 8 out of the World's Top 10 Banks
- 8 out of the World's Top 10 Telcos
- Top 3 in market share across multiple geographies and product categories

This rapid customer growth underscores Array's outstanding value proposition based on the company's solid product lines and diversified business model. The solutions offer reliability, scalability and access for many enterprise applications and network infrastructure. Array's secure Application Delivery Controllers and Universal Access Controllers are deployed in a wide range of industries, including telecommunications, government, banking, healthcare, education and large enterprises. With an established client portfolio, Array has customers spanning the globe – in North America, Asia Pacific and EMEA.

“Our first ten years of success have been highlighted by having some of the world's largest companies rely on our products to solve their security, application delivery and access challenges,” Michael Zhao, president and CEO of Array Networks. “From our initial next-generation traffic manager launch ten years ago, to today's SpeedCore architecture and remote access iPad app, Array has consistently delivered top-notch technology solutions – always evolving to exceed customer expectations. With our recent IPO in Taiwan, and an international customer base across multiple industries, the company is poised to accelerate its trajectory of growth.”

Array is often selected by its customers for delivering innovative solutions at a compelling value. The company's innovations include the first Application Delivery Controller in the market place integrating server load balancing with caching, compression, connection multiplexing and SSL offloading, which eliminated the need for many point products. With the recently announced SpeedCore based family of products, the SpeedStack architecture that the company pioneered is now designed for cloud level scalability.

“We have been using a variety of Array Networks solutions for the last nine years. They have consistently delivered highly scalable and reliable products that meet the demanding needs of both our customers and wireless carrier partners,” said Sanjay Shirole, president and CEO of Xora. “Array has become an integral component of our SaaS infrastructure which handles

millions of transactions on a daily basis. Besides their superior products, a relentless focus on the customer has helped sustain their value leadership in the market.”

Other major innovations include the industry’s highest performing SSL VPN and a very unique SSL based site-to-site networking with the ability to publish resources from one network to another without merging them together. A more recent example is DesktopDirect, a secure remote desktop control (RDC) solution for enterprises, which provides employees with secure access to their desktops from any device, including Apple iPads and iPhones. By enabling people to work in a familiar environment when they cannot be at their desks, DesktopDirect increases productivity and helps enterprises avoid significant losses from unplanned business disruptions.

### **About Array Networks**

Founded in 2000, Array Networks is a global leader in enterprise secure application delivery and universal access solutions for rapidly growing SSL VPN and application acceleration markets. More than 5000 customers worldwide – including enterprises, service providers, government and vertical organizations in healthcare, finance, insurance and education – rely on Array to provide anytime, anywhere secure and optimized access.
