

FOR IMMEDIATE RELEASE

Array Networks Recognized Fourth Consecutive Year by Gartner in 2015 Magic Quadrant for Application Delivery Controllers

Revenue growth, customer traction and forward-looking products fuel positive momentum

Milpitas, CA – October 14, 2015 - [Array Networks Inc.](#), a worldwide provider of application delivery networking solutions, today announces it was recognized in Gartner's Magic Quadrant for [Application Delivery Controllers](#)¹ for the fourth consecutive year. Array believes its position for 2015 reflects its investments in cloud and virtualization orchestration, and support for OpenStack, VMware and Microsoft-based applications. .

Array has grown substantially, with nearly 2,500 ADC customers and over 5,000 deployments worldwide in 2015. Moreover, as a vendor that supports large-scale cloud and service provider customers, Array Networks has introduced significant new forward-looking products including its mid-range virtualized appliance, the [AVX7600](#) with support for both virtual ADC and virtual SSL VPN instances to help enterprise maintain guaranteed application performance with agility of cloud and virtualization technologies.

Array Networks continues to demonstrate positive momentum within its focus on small and medium enterprises and cloud service providers with more flexible solutions. And with the market's continued focus on [infrastructure-as-a-service \(IaaS\)](#) providers, Array is positioned to benefit from the trend toward application delivery purchased as a cloud service with its ability to seamlessly integrate new customers or workloads from an automated cloud management system without having to manually configure stand-alone appliances for each new customer.

"Service providers and enterprises are continuing to move toward cloud and virtualization technologies, but are faced with challenges in maintaining performance and cost-efficiency for networking functions. Array has moved aggressively to introduce new, niche and flexible networking capabilities that keep pace with changes driven by virtualization and cloud computing," said Michael Zhao, president and CEO of Array Networks. "We are very encouraged to see our efforts recognized in the latest Gartner Magic Quadrant and are committed to further improvement based upon meeting and exceeding customer expectations."
